

Health Administration

How can using health administration analytical and decision-making skills address issues, and improve the health care provided to Canadians?

Can reviewing current trends in health care and social services systems inform future health-care strategies?

How does technology and innovation impact health-care environments, and the delivery of health care?

What are the key leadership and management skills required to create high quality interprofessional health-care teams?

What are the key socio-economic factors that impact the health and wellness of Canadians?

The Bachelor of Health Administration (BHA) (Honours) program is offered by the Faculty of Health Sciences in collaboration with the Faculty of Business and Information Technology.

The BHA is a full-time degree program accepting direct entry from high school students and diploma-prepared health-care professionals, offering courses through in-class, hybrid and online delivery formats.

Opportunities available for work-integrated learning experiences with health-care institutions and agencies in the Durham Region.

What will I study?

- Collaborative Leadership
- Current Issues in Health Care
