

Psychology Bachelor of Arts

- Do** groups of people make better decisions than individuals?
- How** do clinicians diagnose mental illness in children and adults?
- How** does our biology and environment combine to make us who we are?
- Can** we empathize equally with people from different cultural backgrounds?
- How** do parenting practices influence a child's social/emotional development?
- Why** do we forget things?

Our program is well-suited for you if you're interested in studying how social and environmental characteristics shape our thoughts, feelings and actions in group dynamics, cultural influences, gender roles, stereotypes, and persuasion.

Core teachings in the social sciences—criminology, legal studies, communications and political science—and a specialized education in statistics and research methods, will complement your education in each of the foundational areas of psychology: social, cognitive, abnormal, developmental and neuroscience.

You're encouraged to complete an honours thesis and/or a practicum in your fourth year. An internship option is also available.

Enrol in our four-year Bachelor of Arts in Psychology program to find the answers to these questions and more.

What will I study?

- Clinical Disorders
- Cognitive/Emotional Processing
- General Social Science and Humanities courses in Communication, Criminology, Legal Studies and Political Science
